Preface.

The long-felt want of a Pocket Gujarati and English Dictionary, which should afford the readiest facilities for reference, has emboldened the compiler to place before the public the present little work. Other Gujarati and English dictionaries, that are now extant, are, for all practical purposes, sealed books to the generality of students on account of their high prices. The present little work, therefore, is offered to the public at a very cheap price, while no pains have been spared to make it really useful.

The Dictionary contains more than 20,000 words. This will itself show that the selection is large and various. It also contains nearly 600 Gujarati & English proverbs.

The Gujarati language, as existing at present, is marked by dialectic differences, according as it has been affected by external influences. These dialectic differences in the language, are the main causes, which render

its orthography difficult and arduous, in as much as, the Gujaratis take a free licence to spell words just exactly as they pronounce. As regards the orthography, I have made *Narma-Kosh* my authority. Another most arduous task in compiling a Gujarati and English Dictionary, is to fix the exact and diversified senses of words. In this compilation, I have conscientiously aimed at the precise renderings of words in their diversified senses.

Sanskrit words are marked S, and this mark simply indicates the parentage of the words, and not their exact form in that sacred language.

In conclusion, the compiler craves the indulgence of his readers for the mistakes that may have crept in through oversight, and expresses a hope that his humble efforts may prove deserving of public approbation.
